Bathroom kits ease renovation

Published on Saturday, Mar 19, 2011

Bath Simple lets you design a bathroom online and then sends you everything you need in one box. [View larger version >>](#)

Bath Simple streamlines the process of designing a bathroom.

The company offers bathrooms-in-a-box containing everything you need to remodel a bathroom, from the tub to the tile grout.

You start by creating a virtual room on the company's website, choosing from a few predetermined designs and a limited selection of options. Once you've completed your virtual room, the company ships you a box containing all the fixtures and materials

needed for the remodeling.

The installation can be done by a contractor certified by Bath Simple or one of your own choosing — or by yourself, if you're a serious do-it-yourselfer. Once the project is complete, the old fixtures and construction waste can be returned in the same box for recycling.

The price depends on a number of factors, including the size of the room and the features you choose.

Information is at <http://www.bathsimple.com>.
